

## Taliban Fighters for A3

A simple set of fighters that represent closely what is in real life, using ported from A2 models and textures (Takistan civilians) courtesy of BIS and their Sample Models.

**NOTE: ALL intentionally do not have any weapons whatsoever, i.e. they have a couple grenades and default A3 LBV Harness (Grey) as equipment. Given the amount of various weapon addons this gives mission makers some flexibility in using various weapons that they would like to arm these for their missions. I simply do not want to spend my time making various alternate configs to accommodate players. Learn how to add weapons and ammunition through the Editor or through scripting.**
